NUCLEAR REGULATORY COMMISSION

In the Matter of)

COMMONWEALTH EDISON COMPANY)

(Braidwood Station, Units 1 and 2))

Docket Nos. STN 50-456,
STN 50-457

**ORDER APPROVING TRANSFER OF LICENSES
AND CONFORMING AMENDMENTS**

I.

Commonwealth Edison Company (ComEd, the licensee) is the holder of Facility Operating Licenses Nos. NPF-72 and NPF-77, which authorize the possession, use, and operation of the Braidwood Station, Units 1 and 2 (the facility). The facility is located at the licensee's site in Will County, Illinois.

II.

Under cover of a letter dated December 20, 1999, ComEd submitted an application requesting approval of the proposed transfer of the facility operating licenses to a new generating company, Exelon Generation Company, LLC (Exelon Generation Company or EGC) to be formed in connection with the proposed merger of Unicom Corporation (Unicom), the parent of ComEd, and PECO Energy Company (PECO). ComEd also requested approval of conforming license amendments to reflect the transfer. Supplemental information was provided by submittals dated January 14, March 10, March 23, March 29, and June 16, 2000. Hereinafter, the December 20, 1999, application and supplemental information will be referred to collectively as the "application." The conforming amendments would remove ComEd from

- 2 -

the facility operating licenses, add Exelon Generation Company in references to the licensee, and make several miscellaneous administrative changes that accurately reflect the transfer of the licenses to Exelon Generation Company. After completion of the proposed transfer, Exelon Generation Company will be the sole owner and operator of Braidwood, Units 1 and 2.

By a separate application dated December 20, 1999, PECO requested approval of the transfer of the facility operating licenses that it holds to Exelon Generation Company. That application is being addressed separately.

Approval of the transfer of the facility operating licenses and conforming license amendments was requested by ComEd pursuant to 10 CFR 50.80 and 10 CFR 50.90. Notice of the request for approval and an opportunity for a hearing was published in the Federal Register on March 9, 2000 (65 FR 12684). The Commission received no comments or requests for hearing pursuant to such notice.

Under 10 CFR 50.80, no license, or any right thereunder, shall be transferred, directly or indirectly, through transfer of control of the license, unless the Commission shall give its consent in writing. Upon review of the information in the application by ComEd, and other information before the Commission, and relying upon the representations and agreements contained in the application, the NRC staff has determined that Exelon Generation Company is qualified to hold the licenses, and that the transfer of the licenses to Exelon Generation Company is otherwise consistent with applicable provisions of law, regulations, and orders issued by the Commission, subject to the conditions set forth below. The NRC staff has further found that the application for the proposed license amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended, and the Commission's rules and regulations set forth in 10 CFR Chapter I; the facility will operate in conformity with the application, the provisions of the Act and the rules and regulations of the Commission; there is

- 3 -

reasonable assurance that the activities authorized by the proposed license amendments can be conducted without endangering the health and safety of the public and that such activities will be conducted in compliance with the Commission's regulations; the issuance of the proposed license amendments will not be inimical to the common defense and security or to the health and safety of the public; and the issuance of the proposed amendments will be in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied.

The findings set forth above are supported by a safety evaluation dated August 3 , 2000.

III.

Accordingly, pursuant to Sections 161b, 161i, 161o, and 184 of the Atomic Energy Act of 1954, as amended, 42 USC §§ 2201(b), 2201(i), 2201(o), and 2234; and 10 CFR 50.80, IT IS HEREBY ORDERED that the transfer of the licenses as described herein to Exelon Generation Company is approved, subject to the following conditions:

- (1) Exelon Generation Company shall provide the Director of the Office of Nuclear Reactor Regulation a copy of any application, at the time it is filed, to transfer (excluding grants of security interests or liens) from Exelon Generation Company to its proposed direct or indirect parent, or to any other affiliated company, facilities for the production, transmission, or distribution of electric energy having a depreciated book value exceeding ten percent (10%) of Exelon Generation Company's consolidated net utility plant, as recorded on Exelon Generation Company's books of account.

- 6 -

- (7) Approval of the transfer of the licenses for Braidwood, Units 1 and 2, is conditioned upon all of the PECO and ComEd nuclear units described in the application to be transferred to Exelon Generation Company becoming owned by Exelon Generation Company contemporaneously.

IT IS FURTHER ORDERED that, consistent with 10 CFR 2.1315(b), license amendments that make changes, as indicated in Enclosure 7 to the cover letter forwarding this Order, to conform the licenses to reflect the subject license transfers are approved. The amendments shall be issued and made effective at the time the proposed license transfers are completed.

This Order is effective upon issuance.

For further details with respect to this Order, see the initial application dated December 20, 1999, and supplemental submittals dated January 14, March 10, March 23, March 29, and June 16, 2000, and the safety evaluation dated August 3, 2000, which are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and accessible electronically through the ADAMS Public Electronic Reading Room link at the NRC Web site (<http://www.nrc.gov>).

Dated at Rockville, Maryland this 3rd day of August 2000.

FOR THE NUCLEAR REGULATORY COMMISSION

Samuel J. Collins, Director
Office of Nuclear Reactor Regulation
